

## Typing at Home with Type to Learn 4

We use a typing program at Fairlands to teach our students keyboarding skills. We want them to be able to touch type before they move on from elementary school. The program we use here in the computer lab is called Type to Learn 4. It is a web-based version so you can access it from home. Students from **grade 2** and up are enrolled in the program. The students have so many things to do each week in the lab that they may not have time to work on typing skills.

If you are interested in using this program with your student(s) at home, please follow these instructions:

### Student use at home procedures:

- Go to the TTL4 website by clicking on the words [FULL VERSION](#).
- Choosing either **Windows** or **Mac**, download and install the appropriate program onto your home computer(s).
- Login to the application with the student's username (*school lunch/library number*), password (*same number*), and account code **100280**.

I can make available a CD of the download if you are having trouble. If so, I would need to know if you need Mac or PC.

If you have any questions feel free to contact me.
